Includes lease condensate

- Net Imports = Gross Imports (line 3) + Strategic Petroleum Reserve (SPR) Imports (line 4) Exports (line 5).
- Unaccounted-for Crude Oil is a balancing item. See Glossary for further explanation.
- Includes finished petroleum products, unfinished oils, gasoline blending components, and natural gas plant liquids.
- ⁵ Includes an estimate of minor product stock change based on monthly data.
- ⁶ Includes field production of fuel ethanol and an adjustment for motor gasoline blending components.
- Includes crude oil product supplied, natural gas liquids, liquefied refinery gases (LRGs), other liquids, and all finished petroleum products except motor gasoline, jet fuels, and distillate and residual fuel oils.
 - ⁸ Includes domestic and Customs-cleared foreign crude oil in transit to refineries.
- ⁹ Included are stocks of all other oils such as aviation gasoline, kerosene, natural gas liquids and LRGs, other hydrocarbons and oxygenates, aviation gasoline blending components, naphtha and other oils for petrochemical feedstock use, special naphthas, lube oils, waxes, coke, asphalt, road oil, and miscellaneous oils.
 - icellaneous oils.

 Trude oil stocks in the SPR include non-U.S. stocks held under foreign or commercial storage agreements.
- For the current 2 weeks, stocks of these minor products are estimated from monthly data. (See Glossary: Stock change (Refined Products)).
- E=Estimate based on data published for the most recent month in the *Petroleum Supply Monthly*, except for exports, crude oil production, and other oils stocks. See Appendix A for explanation of these estimates.

Note: Due to independent rounding, individual product detail may not add to total.
